

DINOSAUR

ACTIVITY SHEET

In Montana, we are privileged to host some of the richest dinosaur fossils, and the state boasts some of the most important discoveries and renowned paleontologists. More than 65 million years ago, the Montana landscape was very different than it is today. A large inland sea covered much of the area that is now Montana. It created a semi-tropical flood plain much like the Everglades of Florida today. During the last days of the dinosaurs, large herds of these massive beasts lived, migrated and nested in the upland areas surrounding the shallow sea. They left us with a treasure trove of fossils to unearth and study!

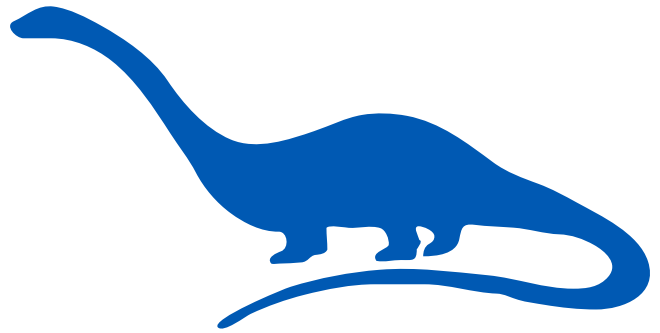

DRAW YOUR FAVORITE DINOSAUR

Why is it your favorite? _____

The Two Medicine Dinosaur Center is home to the longest dinosaur ever - the Seismosaurus! How long is the Seismosaurus?

- 30 FEET
- 88 FEET
- 122 FEET
- 137 FEET

What would you do if you saw a dinosaur in real life?

What does Tyrannosaurus Rex mean?

- BIG TEETH
- TYRANT LIZARD
- MEAT EATER

What's your favorite thing you learned about dinosaurs on your field trip?
